

Skidmore Thoroughbreds

Date: 12/02/25

Liberty League (DIII)

Record: 1-3

Sophia Martinez (#3)

Guard, 5'6, So

Key Stats

- Leads the team in total turnovers (12) and turnover percentage (26.7) this season.
- 26 of her 29 total shot attempts are either dribble jumpers (13) or layups (13).
- Only 7 of her total 38 shots have been threes, and only one was made.
- Main ball-handler in transition (4-9 FGA) and in the pick-and-roll (5-10 FGA)

Player Profile

Martinez thrives as the primary ball handler in isolation situations. She often uses the pick and roll to create space for either a drive to the basket or a dribble jumper. Martinez can be reckless with the ball in her hands, so applying on-ball pressure and forcing her into low quality shots should limit her impact on the game.

Madison Meyer (#10)

Guard, 5'4, Sr

Key Stats

- Very poor as the P&R ball-handler (1-12 FGA)
- 4-10 at catch-and-shoot threes (3-5 on spot-ups) vs 2-15 dribble jumpers
- Has a play for her where she shoots off a handoff while coming from the left (1-5 FGA)
- Prefers to drive to her left (3-3 FGA)

Player Profile

Meyer scores at a very inefficient rate, as her field goal percentage is 33%. This is mainly due to her struggles shooting off the dribble, especially in the pick-and-roll. She likes to shoot off the handoff coming from the left, and also drives to her left when she can. Her main source of efficiency comes from spot-up threes. Going under screens, closing out early, putting heavy pressure once she starts her dribble, and forcing her to her right will likely reduce her overall effect on the game.

Claudia Schneider (#33)

Guard/Forward, 6'0, Jr

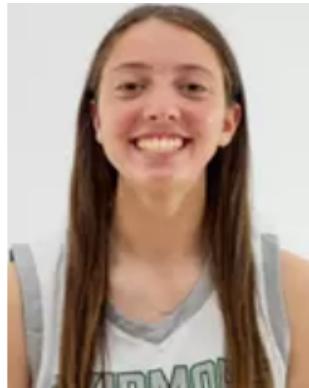

Key Stats

- Leads team in rebounds (5.0 RPG) and steals (2.5 SPG)
- Mainly shoots spot-up jumpers (1-4 2PA, 2-5 3PA)
- 4-11 on catch-and-shoot jumpers vs. 1-6 on dribble jumpers (equally shoots from mid-range and from three)
- Leads team in cut plays (2-4 on basket cuts, 1-4 on flash cuts)

Rachel Carpenter (#22)

Guard, 5'8, Fr

Key Stats

- Leads team in threes made (8 3PM) and 3PT% (53.3%)
- 14 of 15 threes attempted were catch-and-shoot threes (8-14), which included spot-ups (2-5), transition (2-4), and handoffs (3-3)
- Only on mid-range attempted, and no shots near the rim have been taken

Ruby Krop (#21)

Forward/Center, 5'11, Jr

Key Stats

- Leads team in blocks (2.5 per game)
- Poor on spot-up midranges (0-3) and catch-and-shoot midranges (1-7)
- Only one shot attempt at the rim, which was a miss
- Only goes right on drives (2-3 FGA)

Player Profile

Schneider's strength on the court is on the defensive side of the ball, however she's comfortable shooting from all distances. She mainly shoots spot up jumpers and looks to get open through cuts to the basket, more than anyone else on the team. She struggles, however, once she puts the ball on the floor. Her dribble pull-ups are poor and she doesn't drive to the rim often. Closing out early, putting heavy pressure once she starts her dribble, and blocking passing lanes within the paint will likely reduce her overall impact on the game.

Player Profile

Carpenter is Skidmore's three-point specialist coming off the bench. Almost all of her threes are from catch-and-shoot positions, and is elite in this field. However, she only seems to take threes and completely restrains herself from shooting within the arc. Closing out early and forcing her to drive to the basket will likely reduce her impact on the game.

Player Profile

Despite being the starting center, Krop prefers shooting outside the paint, mainly in the mid-range. However, she's not efficient from this range, which is due to her tendency to shoot in coverage, as 6 of her 7 catch-and-shoot mid-ranges were in coverage. When she does drive, she solely goes right. Closing out early and forcing her to drive left will remove her overall impact on the game.

Sara Hastie (#25)

Guard, 5'8, Jr

Key Stats

- Extremely inefficient shooter (7-27 FGA, 3-11 3PA)
- 0-4 on spot-up jumpers, 0-4 on spot-up drives, 1-5 on handoffs
- Shoots well off transition (2-4 FGA) and as the P&R ball-handler (3-8)
- Tends to mainly drive left (0-3 FGA)

Player Profile

Hastie is another player who doesn't shoot well overall from the field. She struggles to shoot and drive from spot-ups, as well as off handoffs. Her success mainly lands in the pick-and-roll, where she can both drive to the rim and shoot from distance. Going over screens to apply pressure and forcing her right for an uncomfortable shot will remove her overall impact on the game.

Stella Criniti (#24)

Guard, 5'6, Fr

Key Stats

- Extremely inefficient shooter (6-22 FGA, 2-12 3PA)
- 1-5 on spot-up threes
- Likes to shoot from mid-range as the P&R ball-handler (2-4 FGA)

Player Profile

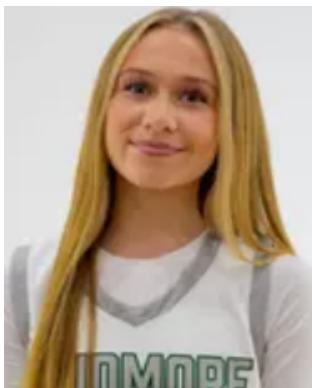

Criniti is currently struggling from the field, especially from three. She has shown positive flashes in transition (2-5 FGA) and on the mid-range as the P&R ball-handler. Going under screens and giving her space while she's behind the arc but guarding her tight once she's within the arc will likely remove her overall impact on the game.

Meghan Drury (#4)

Guard, 5'6, Fr

Key Stats

- Inefficient as the P&R ball-handler (1-6 FGA)
- Good start in transition (3-4 FGA)
- Only 1 midrange shot attempted this season, which was a miss
- 6-12 around the rim vs. 3-9 from three

Player Profile

Drury's not afraid to get to the basket, mainly while in transition or let it fly from three. However, she avoids the mid-range at all costs. Most of the three-point attempts have come off the pick and roll, however she's shooting at a poor rate (1-5 3PA as P&R ball-handler). Picking her up on defense early, going under screens in the pick-and-roll, and forcing mid-range shots will likely remove her impact on the game.

Melissa Severino (#15)

Guard, 5'7, Sr

Key Stats

- Started 3 of 4 games, however doesn't shoot the ball much (3-8 in total FGA this season)
 - 3 of 8 attempts have been spot-up jumpers (1-3)
 - 7 of 8 attempts have been jump shots (1-5 catch-and shoot, 1-2 dribble jumpers)
 - 2-5 from two, 1-3 from three
-

Player Profile

Expect Severino to not be a focal point of the offense. When she does get the ball, it will most likely be a jumper, as only one of her shot attempts was at the rim. Closing out early and forcing her to drive for an uncomfortable shot will likely remove her effect on the game.
