

# Bard Raptors

Date: 12/04/25

Liberty League (DIII)

Record: 2-4

## Shirley Dong (#15)

Guard, 5'6, Sr

### Key Stats

- Inefficient at spot-up threes (5-22 3PA)
- Elite at the P&R ball-handler (8-18 FGA), mainly going into a mid-range (6-11) over a three (2-4) and layup (0-3).
- High turnover percentage (26.5%), especially in transition (50%)
- 4-8 FGA while driving right vs 1-4 FGA when driving left

## Lexi Miller (#30)

Forward, 5'11, Jr

### Key Stats

- 3.7 Offensive Rebounds Per game
- 16.7% FG% (3/18) on Post-Ups (22 possessions) (2<sup>nd</sup> percentile)
- 21.7% Defensive FG% (5/23) on Spot-Ups (27 possessions) (75<sup>th</sup> percentile)
- 40.0% FG% (6/15) on Cuts (21 possessions) (11<sup>th</sup> percentile)

### Player Profile

Dong is one of the main focal points of the offense. As the team's leading scorer (9.2 PPG), she looks to shoot threes off the catch and for the mid-range off the pick-and-roll. While driving, she prefers going right and is solid in finishing around the rim (7-14). She is struggling from three this season. She is also prone to turnovers from simple mistakes such as poor passes, careless dribbling, and travels. Putting pressure early, going over screens, and forcing her right will likely reduce her overall effect on the game.

### Player Profile

Lexi is the teams leading rebounder averaging 9.7 RPG including 3.7 Offensive Rebounds Per Game. She is not the best offensive player as she is shooting 16.7% (3/18) on post ups and 40.0% (6/15) on cuts. She does have a solid mid-range game however 45.5% (5/11) for 2pt jump shots and 62.5% (5/8) from 2 on Catch & Shoot. She is on the court mainly for **rebounding**. When a shot goes up she is always looking to crash the glass so it is **very important that someone gets a body on her and boxes her out**.

## Morgan Kottka (#24)

Forward, 5'11, Fr

### Key Stats

- 28.6% FG% (12/42) on Jump Shots
- 41.7% 3PT FG% (5/12) off of dribble jumpers (85<sup>th</sup> percentile)
- 75.0% Defensive FG% (9/12) on shots at the rim (1<sup>st</sup> percentile)
- 57.1% FG% (8/14) on shots at the rim (76<sup>th</sup> percentile)

## Erin Tobes (#22)

Guard, 5'1, Jr

### Key Stats

- Leads team in assists (4.7 APG), steals (2.3 SPG), turnovers (6 TOPG), and free throws (26 FTA).
- 33 TO%, mainly from transition (37.5%), cuts (37.5%), and as the P&R ball-handler (26.1%)
- Extremely inefficient shooter (25.5 FG%), especially from spot-up threes (1-9), transition (3-9), and handoffs (1-7)
- Most efficient in shooting is actually as the P&R ball-handler, going into either a layup or mid-range (5-13 2PA)

## Aislynn Dixon (#33)

Guard, 5'4, Sr

### Key Stats

- 24.1% Defensive FG% (7/29) on Spot-Ups (32 possessions) (66<sup>th</sup> percentile)
- 17.6% 3PT FG% (6/34) on Spot-Ups (40 possessions) (25<sup>th</sup> percentile)
- 20.0% FG% (3/15) in transition (22 possessions) (13<sup>th</sup> percentile)
- 0.55 STL/TO Ratio (11/20) Leads Team

### Player Profile

Morgan is the teams 2nd leading scorer averaging 7.29 PPG. On offense she is solid at finishing around the rim and will pull it from 3 off the dribble as she is shooting 41.7% (5/12) from 3 off the dribble. **On offense look to attack her and get down hill** as she is not good at guarding shots at the rim. Her defensive FG% on shots at the rim so far this season is 75.0% (9/12) which ranks in the 1<sup>st</sup> percentile. Watching fill when an offensive player gets a step on her she has a tendency to ("opens the gate") letting the offensive player get a straight line drive to the basket.

### Player Profile

Tobes is very erratic when the ball's in her hands. She turns the ball over at a high rate and shoots poorly from the field. In addition, she likes to shoot floaters or runners (2-14 FGA) However, she can get to the free-throw line better than anyone on the team, and create good looks off the pick-and-roll. She also avoids shooting threes, as only 7 of her 51 shot attempts were from behind the arc. Going under screens, giving her space behind the three-point line, and guarding tightly once she is within the arc without fouling will reduce her overall impact on the game.

### Player Profile

Aislynn is mainly on the court for her defensive ability as her defensive FG% this season is 22.7% (10/44). She is especially good at guarding opponents in Spot-Up situations as her defensive FG% on Spot-Ups is 24.1% (7/29) (32 possessions) which ranks in the 66<sup>th</sup> percentile. It is a small sample size but when offensive players test her down hill, her defensive FG% on shots at the rim is 12.5% (1/8). On offense she shoots at a high volume but is inefficient as she is shooting 18.0% from 3 (9/50).

## Ava Gregory (#8)

Guard, 5'6, Fr

### Key Stats

- Mainly shoots spot-up threes (5-16 3PA) and transition (5-14 FGA)
- Transition shots were mainly jumpers on the left wing (0-6 FGA)
- 1-9 guarded vs 7-18 unguarded catch-and-shoot 3PA
- 5 of 6 drives were to her right (0-3 FGA)

## Jessica Martin (#23)

Guard, 5'4, Jr

### Key Stats

- Averages 6.8 PPG, however scored 30 vs MCLA (9-15 3PA)
- Primarily scores off spot-up threes (8-21 FGA)
- Doesn't drive often, however goes right when she does (0-3 FGA)
- Also decent in transition (4-7 FGA)

## Tianna Gonzalez (#4)

Guard, 5'7, So

### Key Stats

- 18.8% Defensive FG% (3/16) on Spot-Ups (18 possessions) (70<sup>th</sup> percentile)
- 38.9% FG% (7/18) on shots at the rim (25<sup>th</sup> percentile)
- 2.0 Offensive Rebounds Per Game
- 33.3% FT% (3/9)

## Player Profile

Gregory is looking to shoot off the catch from behind the arc when given the chance. She's one of the team's main focal point in transition and is mostly found on the left wing. When she does drive, she wants to go to her right, and her finishing around the rim isn't the best (4-10 FGA). Closing out early and forcing her to drive to her left will likely reduce her impact on the game.

## Player Profile

Martin is mainly used as a three-point specialist off the bench. Her performance against MCLA shows once she gets hot, she's near impossible to guard. She doesn't drive to the basket much, as only two of her shot attempts were at the rim. Closing out early and forcing her to drive, preferably to her left, will like remove any significant impact she may have on the game.

## Player Profile

Tianna is a hustle player as she is not the best offensive player shooting 31.4% (11/35) from the field including 38.9% (7/18) on shots at the rim and 28.6% from 3 (2/7). She is also a 33.3% (3/9) FT shooter. But is a pesky defender and is looking to crash the boards. On defense this season opponents are shooting 16.7% from the field (3/18) and 16.7% (2/12) from 3 when guarded by her. When a shot goes up on offense she is looking to go get the ball as she is averaging 2.0 Offensive Rebounds per game so make sure to box her out.
