# Stevens Ducks

---

Leyla Castro (#3)

Guard, 5'5, Sr

Key Stats

- All-MAC Freedom First Team

- 38.1 FG% in transition vs. 31.8 FG% overall

- 37.1 3PT% Unguarded vs. 27.3 3PT% on Guarded for Catch and Shoot threes

- Struggles significantly driving right (1-10) compared to driving left (5-16)

Player Profile

Expect high usage of Castro in the pick and roll and in transition, as she's always looking to push the pace and get her teammates high quality looks. In addition, she'll look to catch and shoot from behind the arc whenever given the space. She is, however, very inefficient when driving to the basket, especially to her right. Closing out early, forcing her to her right, and going over screens to prevent threes will likely reduce her impact on the game.

Olivia Schubiger (#2)

Guard, 5'8, Sr

Key Stats

- 9.5 PPG, 4.7 RPG, 1.4 SPG last season

- About 32% of shots are spot-up midranges (18-50) and drives (13-26 driving right vs. 9-20 driving left)

- More efficient on dribble jumpers (40-100) compared to catch and shoot jumpers (27-79)

- 29.9 FG% against, however struggles to guard drives to the left (10-25) compared to drives to the right (0-16)

Player Profile

Expect Schubiger to get off a shot in the midrange, as she thrives in this area. She's extremely efficient in spot-up drives, but she's not the best in catch and shoot situations. Encouraging shooting off the catch by giving a little space and forcing her to make a decision will likely reduce her overall impact on the game.

On the defensive end, she's solid all around, however attacking the left side may benefit the team the most, as this is her weak point and she's significantly more comfortable guarding drives to the right.

Audrey Kehoe (#34)

Forward, 6'0, Sr

Key Stats

- Led team in rebounds (6.9 RPG) and blocks (1.4 BPG)

- Main looks are putbacks (13-24), basket cuts (7-17), and post ups while moving towards the left shoulder (5-12)

- Also only 1 3PA last season

- While a great defender (31.0 FG% against), her biggest weakness is post-up moves toward the left shoulder (5-11 against)

Player Profile

Kehoe is a defensive force in the paint. With that being said, she's more liable defending the post-up, especially moves toward the left shoulder. Attacking this side, as well as getting physical with her while boxing out, will help our players score more while facing her. On offense, Kehoe is not a big threat, however most of her points come within the paint through the post, cuts and putbacks. Preventing any open lanes in the paint as well as pushing her outside the paint for uncomfortable shots will remove any potential offensive impact.

Dorothy Loffredo (#13)

Guard/Forward, 5'10, Sr

Key Stats

- High usage in spot-up midranges (23-77)

- Efficient in transition (26-48) and Flash Cuts (24-50)

- Poor on drives (7-28) and below average finishing around the rim (41-98)

- Excels in defending spot up jumpers (12-56), but struggles in the post (8-14)

Player Profile

Loffredo lives in the midrange, as this is where she's her most efficient. Expect high usage in spot-up midranges, transition, and flash cuts. She avoids shooting threes, and struggles to finish around the rim. It's best to back off when she's behind the arc, and then guard tightly once she's withing the arc in order to reduce her effect in the game. In addition, it's best to drive to the basket while going 1-on-1 with her, as she's significantly worse guarding within the paint compared to guarding jumpers.

Isabella Duval (#11)

Guard, 5'4, Sr

Key Stats

- Extremely High Volume 3PT Shooter (37-124), especially catch and shoot (31-90)

- Very efficient in transition (16-35 FGA)

- Poor as the P&R Ball-handler (4-26 FGA, 18.2 TO%)

- Inefficient in dribble jumpers (6-34 3PA)

Player Profile

Duval was a three-point specialist off the bench last season. It's expected she will have a greater role within the team this season. She's most efficient in the catch and shoot, as well as in transition. However, she tends to struggle once she puts the ball on the floor, as she has poor performance as the pick and roll ball-handler and dribble jumpers. Closing out early and putting heavy pressure once she starts her dribble will likely reduce her impact on the game.

Katherine Bogutsky (#4)

Guard, 5'6, So

Key Stats

- 10.9 MPG in 26 GP last season
- High Usage in Spot-Ups Jumpers (14-44 on 3PA)
- Efficient around the rim (11-18)
- Struggles when guarding the P&R Ball-Handler (6-14)

Player Profile

Bogutsky is another player who will mainly let it fly from three when give the opportunity, so it's important to close out early to prevent any open looks for her. In addition, she doesn't guard the pick and roll very well, so putting her in these situations where she does have to guard it will greatly benefit our team.

Fiona O'Boyle (#22)

Forward, 6'1, So

Key Stats

- 11 MPG on 20 GP last season
- Main looks were spot-up midranges (5-9) and flash cuts (3-8)
- Excels in rebounds (4 RPG) and putbacks (4-8)
- Only 1 3PA last season

Player Profile

O'Boyle's greatest strength is rebounding, averaging about 13.09 rebounds per 36 minutes. Offensively, most of her opportunites come as midranges and putbacks. Getting physical while boxing out and closing out early on midrange shots will greatly reduce her overall impact. In addition, it's best to let her shoot from three if she gets in this situation, as she's very uncomfortable shooting from this range.

Sugar Williams (#5)

Guard, 5'7, So

Key Stats

- No stats found
-
-
-

Player Profile

Sophomore guard from Binghamton, New York (Binghamton). Majoring in Business Technology.

Trisha Nair (#12)

Guard, 5'6, So

Key Stats

- No stats found
-
-
-

Player Profile

Sophomore guard from Edison, New Jersey (John P. Stevens HS). Majoring in Cybersecurity.
